**Subject:** Microsoft Settlement

Dear People,

Please do not settle with Microsoft. They need to be punished and any settlement they can agree to is insufficient punishment.

The history of their actions in regards to other settlements shows they are not trustworthy and will not abide by settlements.

This company has hurt all consumers by profiteering, quashing competition and creating mediocre software for which there are no alternatives. Please help invigorate the market by curbing Microsofts predatory business practices through imposing a true solution rather than reaching a settlement.

Sincerely yours,

Jim Cabbage
